Experience

Relanto Bengaluru
Senior Data Scientist / Senior AI Engineer *Sep 2025 – Present*

- Developed and optimized production-grade xDR (Extended Detection and Response) agent workflows to automate personalized sales outreach across multiple customer engagement scenarios.
- Designed and maintained multi-agent systems for email generation, review, and delivery, enabling scalable intent-driven customer communication.
- Built an AI-powered upsell recommendation agent that identified high-utilization customers early in their subscription lifecycle and generated targeted engagement campaigns to improve expansion opportunities.
- Developed customer re-engagement workflows leveraging conversation transcripts and CRM notes to generate personalized win-back communications for churned accounts.
- Integrated Arize AI tracing, monitoring, and evaluation frameworks into production LLM applications, enabling observability, behaviour analysis, and continuous quality improvement.
- Collaborated with product, sales, and engineering stakeholders to define business rules, prompt strategies, and evaluation metrics for scalable AI-driven sales automation solutions.

9Nexus (Consulted for Cognizant and GSK)
GenAI Developer *Oct 2024 – Sep 2025*

- Developed an LLM-powered workflow analyzing 150K+ employee feedback comments and live agent call transcripts to uncover hidden Source-to-Pay process issues.
- Built Databricks-based ETL pipelines using Pandas, extracted themes, sentiment, processes, and personas, and stored insights in SQL and VectorDB systems for RAG applications.
- Enabled executive leadership to identify systemic and regional pain points through automated executive summaries and root-cause analysis APIs.
- Reduced reporting turnaround time from 5 months to under 5 minutes, achieving approximately 99.9% effort reduction.
- Developed a table extraction pipeline using Azure Document Intelligence to retrieve study intervention tables from document repositories and standardize outputs through RegEx-based cleaning.
- Built intelligent document processing solutions to extract scientific substance information and key attributes from PDFs using OCR, Azure AI Search, and Retrieval-Augmented Generation techniques.

ARThink AI
Data Scientist – Generative AI *Aug 2023 – Jul 2024*

- Built an end-to-end virtual assistant pipeline integrating multilingual speech-to-text, translation, Retrieval-Augmented Generation, and text-to-speech capabilities.
- Fine-tuned LLaVA and LLaMA models using Quantization and LoRA techniques for efficient deployment in a fitness application.
- Developed a facial-recognition-based attendance management system using video-to-video comparison to handle varying lighting conditions, facial expressions, and viewing angles.
- Built a customer service chatbot for an airport using structured agents, OpenAI function calling, few-shot prompting, chain-of-thought prompting, and RAG.
- Developed an automated image-processing pipeline using YOLO-based ROI detection for spectacle prescription classification and information extraction.

DeetsDigital
Data Science Trainee *Feb 2023 – Jul 2023*

- Implemented super-resolution techniques to enhance drone imagery for downstream object detection tasks.
- Automated invoice information extraction from PDF documents and transformed outputs into client-specific Excel formats.
- Applied OCR techniques for multilingual document understanding and information extraction.
- Built proof-of-concept sentiment analysis solutions on facial data captured through CCTV footage.
- Developed resume parsing workflows using OCR and LLMs to dynamically match candidates to relevant job descriptions.

Univ.AI
Teaching Assistant *Apr 2022 – Jan 2023*

Advanced Business & Healthcare Solutions
Quality Analyst Trainee Intern *Jan 2022 – Jun 2022*

Projects

PharmaBot

- Developed a conversational pharmacy assistant capable of handling inbound and outbound customer interactions using ASR, RAG, LLMs, text-to-speech, and Twilio integration.

EDAA (Emotion Detection and Analysis)

- Built a web application analyzing audience video (facial expressions) and text (speech context) to generate automated reports helping public speakers improve delivery.

Skills

Programming: Python, SQL

Generative AI & Agents: LLMs (GPT, LLaMA, LLaVA), LangGraph, LlamaIndex, Crew.AI, Agents, Prompt Engineering, RAG, Pydantic, Ragas, Arize

Vector Databases: Pinecone, ChromaDB, Azure AI Search

Machine Learning & NLP: Scikit-Learn, TensorFlow, PyTorch, Hugging Face, SpaCy, NLTK, Sentiment Analysis, Intent Classification

Computer Vision: OpenCV, YOLO, DeepFace, Visual Question Answering

Cloud & Data Platforms: Azure AI, Azure Document Intelligence, Azure Search, Blob Storage, Databricks, AWS Textract, GCP

Frameworks & Tools: FastAPI, Flask, Streamlit, Docker, Git, GitHub

Speech Technologies: Whisper, ASR, TTS

Data Analysis: NumPy, Pandas, Matplotlib, Seaborn, Statistics

Education

Gujarat Technological University
Bachelor of Computer Engineering *2018 – 2022*

- CGPA: 9.02 / 10
